

A new product update from... dla

Bruck Lighting presents... BRUCK.green
smart energy

1) Bruck Green is a collection of LED based decorative pendants and track (typical 50 watt lamp is replaced with 3 watt LED).

BOLERO

Bolero LED Down on V/A track

59" insulated cable length standard*,
custom lengths may be specified on all pendants,
add /MP to specify 4" Kiss Canopy w/ 100-240V driver**,
add /MP2 to specify 2" Kiss Canopy w/ 100-240V driver**

2) The LED collection retains all of the beauty and fine detailing of Bruck, but uses less than 1/10th the energy of halogen sources (energy savings can help achieve LEED certification).

3) Lamp maintenance is virtually eliminated (halogen lamps are changed every 8 months, LED's can last 15 years or more).

4) Larger scale energy saving compact fluorescent pendants are also available.
