

A new product update from...dla

Hubbell Building Automation introduces simple, inexpensive daylight harvesting.

- 1) Luxstat Controllers provide continuous dimming based on available daylight levels.**
- 2) Controller features push-button programming and automated set-up.**
- 3) Five pre-programmed presets fit most typical applications (eliminates the need for complicated set-up in most cases).**
- 4) Unit can easily be set to control 1 - 3 zones; each zone adjusts independently.**
- 5) Earns as many LEED points as complex and expensive competitor's products, at a small fraction of the cost.**

Daylight Harvesting Controls

Luxstat Dimming Control Module

KEY FEATURES

- Open Loop Continuous Dimming Daylight Harvesting Control
- Pushbutton programming
- Automated setup
- LCD display provides Real Time light level readings
- 5 pre-programmed applications – Fits most applications without complicated setup
- Continuous Dimming control - Chose from 1, 2 or 3 zones
- Individual adjustment for each channel of control
- Compatible with any 0-10volt controllable ballast
- Integration with occupancy sensors and manual override controls
- DIN rail mounting
- California Title 24 compliant
- UL & cUL Listed
- 5-Year Warranty
