

*A new product update from...dla*

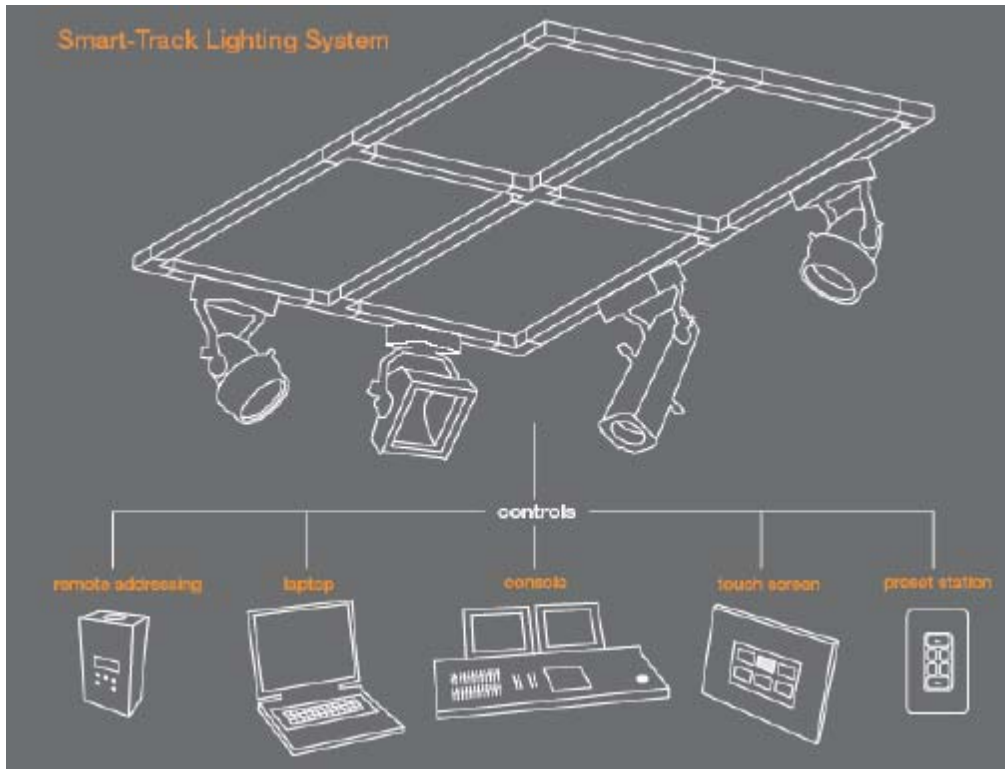

Altman introduces the most advanced track lighting system on the market.

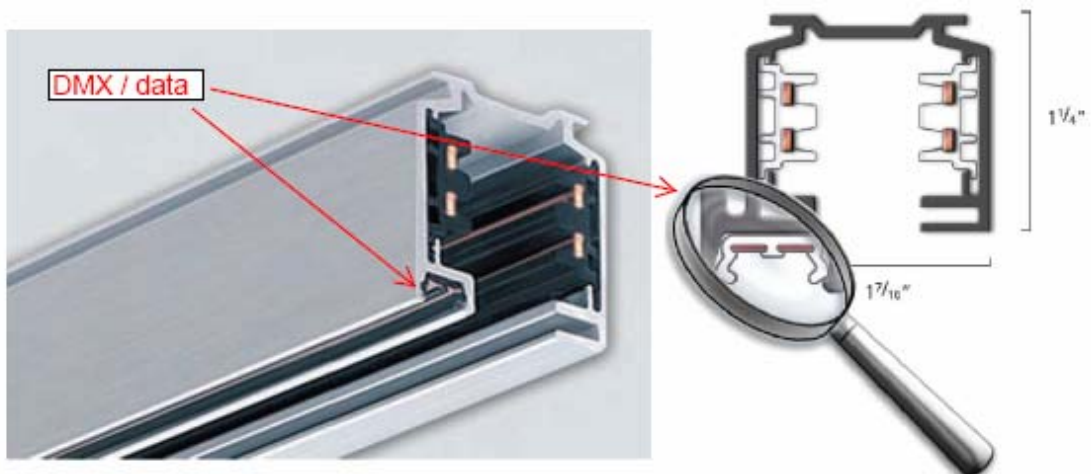

**1) Altman "Smart Track" offers digitally addressable dimming (halogen), switching (MH), and color mixing (LED) all on the same circuit (each track head is individually addressable).**

**2) Individually control up to 512 track heads, or groups of heads, on one system** (additional universes of DMX may be used for larger projects).

**3) Unlike other systems, Smart Track offers 2 circuit, 2 neutral...and separate DMX/data bus** (creating endless control possibilities).

**4) Altman offers popular shapes and sources.**
